Morning peak, 7–10 am: 46% of revenue in 4 hours

Scenario verdict

DOES NOT PAY OFF
A second barista and machine need +24% peak sales to break even.
At +10% the net result is -31,895 for the period.

Assumptions

- The data has no dates, so the number of days is set by the slider (181 by default).
- Gross margin (70%) and the hourly cost of a second barista with a machine ($25) are estimates, not data from the company.
- One row of data is one sold item line, not a receipt.
- Peak hours are 7–10 am. The scenario assumes extra capacity raises peak sales by the selected percentage.

Store	Peak Sales per Hour	Peak Margin per Sale	Break-even Extra Sales per Hour	Break-even Uplift %
Hell's Kitchen	33.27	3.31	7.55	23%
Lower Manhattan	32.85	3.43	7.28	22%
Astoria	26.96	3.21	7.79	29%
Total	**31.03**	**3.32**	**7.52**	**24%**

Store Comparison: what to copy from the best store

Store Practice Opportunity	Store Practice Opportunity, %	Upsell Gap	Beans Gap
45.90K	6.6%	30.93K	14.98K

Sales per Store

Store	Total Revenue	Units per Sale	Revenue per Sale	Beans Revenue Share	More units per sale	More bean sales
Astoria	232,244	1.40	4.59	4.4%	16,294	8,080
Lower Manhattan	230,057	1.50	4.81	4.9%	0	6,896
Hell's Kitchen	236,511	1.41	4.66	7.9%	14,634	0
Total	**698,812**	**1.44**	**4.69**	**5.7%**	**30,928**	**14,975**

- **Astoria**: test a 6 am opening — the other two stores earn 7.5K and 14.4K in that hour.
- **Lower Manhattan**: cut hours after 7 pm — 1.0K revenue for the whole period.
- **Astoria & Hell's Kitchen**: copy Lower Manhattan's upsell (1.50 units per sale).
- **Astoria & Lower Manhattan**: copy Hell's Kitchen's bean retail (7.9% of revenue).
